Aim of the International Research Register of Studies on Co-operatives in Developing Countries is to maintain a centralized record and disseminate information concerning research studies and other publications.

The Research Register is an ICA project within the framework of the Co-operative Development Decade.

The Bibliography has been collected and elaborated by the Polish Co-operative Research Institute, prepared for publication and provided with indexes by the Hungarian Co-operative Research Institute, and printed in Hungary.

A supplement of the Directory of Organizations Engaged in Co-operative Research is intended to be attached to the Bulletins. Informations concerning research organizations are welcomed.

The Research Register was first produced and published as a joint venture of the Hungarian and Polish Co-operative Research Institutes as a contribution to the ICA Co-operative Development Decade /1971-81/. During that period eleven bulletins were issued. They provided, as was stated in the Foreword to Bulletin No.11, the last of that series, " a most valuable source of information concerning studies on co-operatives and co-operative development in developing countries, and a bibliography of relevant articles and publications ". That Foreword also reported that consideration was being given to continuing the publication of the Research Register.

The issue of Bulletin No.12 marks the beginning of a new series; and the ICA takes this opportunity to record its thanks and gratitude to the Hungarian and Polish Co-operative Movements for the continued collaboration and assistance of their research institutes in the production and distribution of the Register. For this second series the Committee for the Promotion of Aid to Co-operatives /COPAC/ have joined the Editorial Board responsible for the Research Register and is contributing technical assistance in collecting and compiling information for it. COPAC has given very substantial help in collecting the material contained in this issue. Its interest in and support for the Register is warmly welcomed and much appreciated.

The ICA is confident that this new series of the Register will continue the valuable service to co-operative education and research workers provided by the first series; and records its thanks to all who have made its continued publication possible.

Readers' Guide

After bibliographical data each item contains indication of language  
and of the geographical coverage.

English title of studies is always underlined by a broken line, in  
case the original language differs, a translation is given in  
brackets.

In case of unpublished papers, the date mentioned is that of finish-  
ing research or manuscript. In such cases the sponsoring institute  
is also indicated.
