## FOREWORD

In the recent years, there had been fast development in the usage of information and technology and communication systems world wide and particularly in India to stream line the system of good governance at every level. The development of this technology is quite visible in every field. With the use of this technology, new economic combinations, potentials and prospects are shaping. It has also been visualised that those who are sound in knowledge and decision making process are ahead in turning these opportunities into reality.

The network of Indian Cooperative Movement is vast and spread from village to national level. It covers cent percent of villages and 71 % of rural house holds, occupy a key position in the agriculture development. Hence, it can not afford to left untouched with the use of this modern technology. Moreover, with the emergence of the National Agriculture Policy, the sharing responsibility of cooperatives have increase to a great extent in the developmental process and particularly to actualise vast untapped potential of Indian agriculture, strengthen rural infrastructure to support faster agriculture development, promote value additions, accelerate the growth of agri-business and generate rural employment.

In order to actualise these vast potentials towards sustainable development, the agricultural productivity will have to be increased by way of ensuring better use of inputs, resources, harvesting of natural water resources, marketing channels, storage facilities, distribution channels, value addition activities, market information and a regular monitoring network system to plan and design a mechanism in case of deviation in targeted results. And all these can not be managed and controlled effectively with present system. Therefore, cooperatives should seriously look into this aspect and without any loss of time, they must introduce the IT applications to be at par with other sectors. No. doubt, a number of cooperatives who are at par with others in technology are well placed, comfortable and have the capability to face any challenges whereas others are not comfortable. My appeal to all is to adopt new approach of technology and promote a centralised online network of cooperative information to keep breast of the development . This will certainly help in monitoring the viability of the institutions and apply a corrective measures.

With the approval of Multi State Cooperative Society Act 2002 and also announcement of the National Cooperative Policy together will provide greater autonomy, broad base their network and lead the cooperatives to function and perform their business in a systematic and democratic manner. I am sure this will promote viability of the institutions and ensure rural economic growth and prosperity of the farmers.

The present edition of the profile- 9<sup>th</sup> in series is comprehensive, informative and covers the development of credit and non-credit cooperatives. This publication has been possible on account of the significant contribution of Shri Bhagwati Prasad, Chief Executive and strenuous efforts put in by Shri K.L.Nalwaya, Executive Director and his colleagues in the National Cooperative Data Bank and Information and Technology Division. I place on record that NCDB & IT division has been disseminating valuable information regularly to all those who are involved in cooperative development activities. I am sure that the users will find the publication quite useful.

## ACKNOWLEDGEMENT

As you are aware that we are living in twenty first century, the most modern and knowledge based society era where performance of the society, organisations and individuals are judged on the basis of their information network and decision making process.

In our economic planning system , the cooperatives have been accepted as instrument of socio-economic development since 2<sup>nd</sup> five year plan and today it is discharging the responsibility as one of the balancing sector of Indian economy particularly for socio-economic development of rural society. Over the years, the size and its activities have increase to many fold. Today, it has 545,354 cooperatives represented by 220.2 million members. The contribution of cooperatives in the green and white revolution are significant. India is basically an agricultural country and even today, agriculture and allied activities contribute nearly 30 % in our GDP. The 10<sup>th</sup> five year plan which has recently been approved have laid special emphasis on agriculture development and rural employment generation by using vast untapped resources into our economy.

The another concern to cooperatives is of increasing unemployment trends due to privatisation and closer of public sectors units as a part of reform process. But there is a vast potential in cooperatives for generating self-employment. Moreover, there is every apprehension that people may migrate back to rural areas. In this situation, the responsibilities of socio-economic development and services to the farmers, artisans and weaker section of the community will further be agreevated. No doubt, cooperatives have lots of potentials to serve but unless or until, they are re-oriented to professionalism and equipped with modern tools and usage of IT applications, it may not be possible to discharge their duties sincerely.

The National Cooperative Union of India has been propogating this concept since 1990 about the importance of the management information system and usage of modern technology by cooperatives. But still there are wide gap as far as technology transfer is concerned. The organisations in cooperatives who have strengthen both these aspect are comfortable, better placed and ready to face any challenges of reforms. The NCDB & IT division of NCUI continued their efforts to assist the policy makers and planners in providing the cooperative development information regularly through their regular publications, studies, soft-modules .

The present edition of "Indian Cooperative Movement - A Profile" 9<sup>th</sup> in series, is an informative publication which provide a comprehensive information in respect of credit and non-credit cooperatives, Organisational structure of Indian cooperatives, achievements and trends of development in different segments of cooperatives, status of cooperative management, information about cooperative products with images of the products as well as agricultural development in selected countries of Asia and Pacific.

In the process of bringing out this successful publication, the union has received cooperation from the various Ministries, Registrars of Cooperative Societies, NABARD, NCDC, NDDB, NCUI, Member Organisations and Institutes of Cooperative Management in timely providing us the relevant materials and data . I sincerely thanks to all and hope their similar cooperation will be available regularly to us. The NCUI will continue to develop more informative documents and get back to you after an interval of time.

This Publication has been designed, developed and presented by Mr. K.L. Nalwaya, Executive Director in the National Resource Centre/NCDB&IT Division. I sincerely thanks him for his sincere efforts put in bringing out professional and informative publication.

## PREFACE

The National Resource Center of National Cooperative Union of India presents yet another publication entitled “Indian Cooperative Movement – A profile 2002” 9<sup>th</sup> in series to ensure and full fill our commitment to make available regular information to policy makers, planners and user organisations on the latest development of cooperatives.

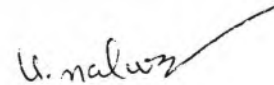

The NCDB and IT dept. of NCUI continued to interact and study the requirement of the user organisations and accordingly keep on design the collection strategy. I am happy to inform you that in the recent years, the importance of the information have been realised at every level in the cooperatives and other related organisations particularly of cooperative development. Secondly, the academicians and scholars visits to this dept. have increased to many fold for want of information and guidance. Considering the importance of management information system and increasing use of the connectivity in cooperatives, the NCUI has also integrated the information of the cooperative development in our website : [www.ncui.net](http://www.ncui.net) This will facilitate the users to download the information on their desk and avoid unnecessary traveling and expenditure.

Moreover, it had been our endeavor to collect right kind of data, analyse them and present accurate and systematic information to our readers. Hence, our every edition of the profile is an improved version and more presentable with additional features. During the year, one of the suggestions from the member organisations was to incorporate the list of the cooperative products. Considering the importance, we have incorporated a new chapter of presenting the cooperative products along with the images. Efforts have been made to broad based the information network of the profile whether of general information or cooperative development.

It is a fact that information is knowledge and knowledge is to be shared. Therefore, information should not be restricted to one way system but be reciprocal. Hence, my appeal to all is to kindly advise the concerned officials to ensure us the latest data of your sectoral development in our prescribed format. We will get back to you with more analysed information in our new version of the profile in better manner.

This publication has been possible due to active support of our Member Organisations, concerned Ministries, Office of the Registrar of Cooperative Societies (all states), Commissioner of Handloom and Handicraft, Cane commissioner, NCDC, NABARD, Regional Directors/Principals and Faculty Members of Institute of Cooperative Management for their timely furnishing the requisite information which enable us to complete the Profile on time. I sincerely thanks to all and hope to continue similar cooperation in future too. I also extend my hearty thanks to my officers and staff members of NCDB & IT division for their constant support in bringing our this publication to this level.

My sincere and respectable gratitude are due to Dr. S.S. Sisodia, President and Shri Bhagwati Prasad, Chief Executive, NCUI for their encouragement and guidance in bringing out this publication.

# International Co-operative Alliance

## STATEMENT ON THE CO-OPERATIVE IDENTITY

### Definition

A co-operative is an autonomous association of persons united voluntarily to meet their common economic, social and cultural needs and aspirations through a jointly-owned and democratically-controlled enterprise.

### Values

Co-operatives are based on the values of self-help, self-responsibility, democracy, equality, equity and solidarity in the tradition of their founders, co-operative members believe in the ethical values of honesty, openness, social responsibility and caring for others.

### Principles

The co-operative principles are guidelines by which co-operatives put their values into practice.

#### 1st Principle: Voluntary and Open Membership

Co-operatives are voluntary organisations, open to all persons able to use their services and willing to accept the responsibilities of membership, without gender, social, racial, political or religious discrimination.

#### 2nd Principle: Democratic Member Control

Co-operatives are democratic organisations controlled by their members, who actively participate in setting their policies and making decisions. Men and women serving as elected representatives are accountable to the membership. In primary co-operatives members have equal voting rights (one member, one vote) and co-operatives at other levels are also organised in a democratic manner.

#### 3rd Principle: Member Economic Participation

Members contribute equitably to and democratically control the capital of their co-operative. At least part of that capital is usually the common property of the co-operative. Members usually receive limited compensation, if any, on capital subscribed as a condition of membership. Members allocate surpluses for any or all of the following purposes: developing their co-operative, possibly by setting up reserves, part of which at least would be indivisible; benefiting members in proportion to their transactions with the co-operative; and supporting other activities approved by the membership.

#### 4th Principle: Autonomy and Independence

Co-operatives are autonomous, self-help organisations controlled by their members. If they enter into agreements with other organisations including governments or raise capital from external sources they do so on terms that ensure democratic control by their members and maintain their co-operative autonomy.

#### 5th Principle: Education, Training and Information

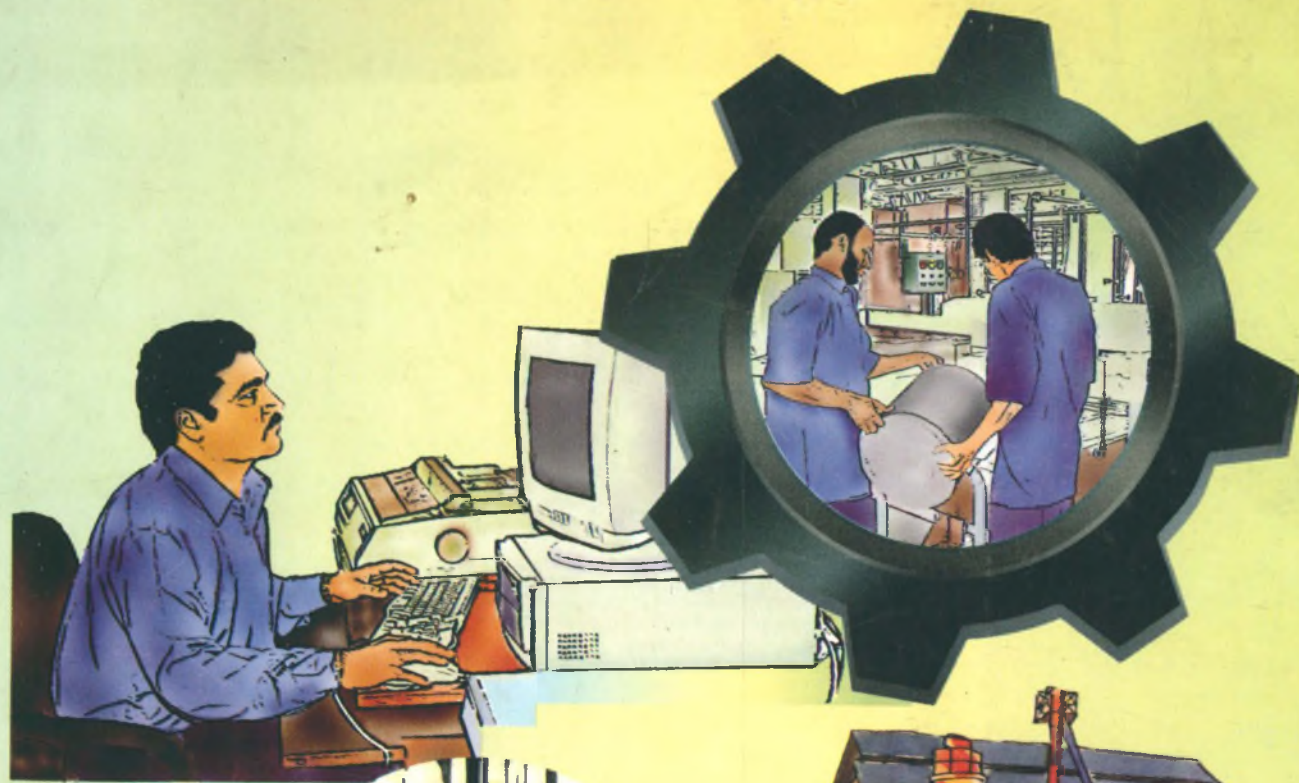

Co-operatives provide education and training for their members, elected representatives, managers and employees so they can contribute effectively to the development of their co-operatives. They inform the general public particularly young people and opinion leaders - about the nature and benefits of co-operation.

#### 6th Principle: Co-operation among Co-operatives

Co-operatives serve their members most effectively and strengthen the co-operative movement by working together through local, national, regional and international structures.

#### 7th Principle: Concern for Community

Co-operatives work for the sustainable development of their communities through policies approved by their members.
