## FOREWORD

The ICA Regional Office and Education Centre for South-East Asia have pleasure in bringing out a revised and somewhat expanded version of the Cooperative Trade Directory. It may be recalled that the first Directory was issued in March 1964 and aroused sustained interest among cooperative organisations in many countries of the world.

The present Directory covers eight countries for which the Regional Office works. Some new information has been added. This relates to the quantities required by cooperative organisations or made available by them for exports, the country of origin of imports and destination of exports etc. Originally, it was planned to indicate the price ranges for the commodities listed in the Directory. Unfortunately, the idea had to be given up as this data was not forthcoming from most parties.

A Directory of this kind which has any claims to provide comprehensive information can only be produced over a period of time. We, therefore, plan to revise it from time to time and add new material to enhance its usefulness to Cooperators. We hope, nevertheless, that the document in its present form will make a modest contribution towards providing useful information to cooperative organisations interested in building trade relations beyond their national frontiers.

The Regional Office and Education Centre for South-East Asia of the International Cooperative Alliance would like to express their deep appreciation to all those organisations who have supplied the information included in this Directory.
