FOREWORD

In a liberalised and competitive economy information and statistics play a very significant role in corporate decision making system. Cooperatives, being one of the important segments of Indian economy, therefore, have to evolve an effective information system which will ensure continuous flow of facts and figures to all those who are involved in the cooperative development i.e. the members, board members, executives, policy makers, opinion leaders etc. The National Cooperative Union of India has, therefore, set up a National Cooperative Data Bank (NCDB) to meet the informatics needs of cooperatives. The NCDB is fully modernised and is having net working link with Institutes of Cooperative Managements at State level.

The present edition of the publication "Indian Cooperative Movement - A Profile", makes a comprehensive and updated presentation of the progress and achievements of different segments of Indian Cooperative Movement, not only through statistics but through impressive graphics highlighting the present status of cooperative sector.

This publication has been possible on account of strenuous efforts put in by Shri K.L. Nalwaya, Director and his colleagues in the National Cooperative Data Bank and functional support of artist Shri S.R. Nanda and National Cooperative Printing Press.

I hope this would be a useful reference hand out for the cooperative policy makers and implementers.

(B.D. Sharma)
Chief Executive

PREFACE

The National Cooperative Data Bank of NCUI has brought out 4th edition of “Indian Cooperative Movement - A Profile” on the occasion of the 13th Indian Cooperative Congress, the highest forum of the Indian Cooperative Movement . The profile contains analytical information on credit and non-credit sectors of cooperative movement, their organisational structures and functions; as well as important aspects of private and public sectors so as to highlight positioning of cooperatives in national economy.

The earlier editions of the Profile had been a source of reference for the cooperative planners, policy makers, researchers and user-organisations within and outside the country. In order to make the document comprehensive to meet the expectations of the users, this edition has incorporated new areas such as Electricity cooperatives, Irrigation cooperatives, Farming cooperatives, Students cooperatives, Poultry cooperatives and Women cooperatives. In addition, trends in the cooperative development are presented through graphics and relevant symbolic pictures to making it more presentable.

One of the main objectives of the Profile is to highlight the importance and concept of the MIS for effective decision-making process in cooperatives.

I am grateful to Shri B.S. Vishwanathan, President and Shri B.D. Sharma, Chief Executive, NCUI for their guidance and support to me to bring out this edition.

I hope the contents of the Profile will meet the expectations of the cooperative users’ whose views will be very useful for further improvements in the next edition.

K. L. Nalwaya
Director(NCDB)

STATEMENT ON THE CO-OPERATIVE IDENTITY

Definition

A co-operative is an autonomous association of persons united voluntarily to meet their common economic, social, and cultural needs and aspirations through a jointly-owned and democratically-controlled enterprise.

Values

Co-operatives are based on the values of self-help, self-responsibility, democracy, equality, equity and solidarity. In the tradition of their founders, co-operative members believe in the ethical values of honesty, openness, social responsibility and caring for others.

Principles

The co-operative principles are guidelines by which co-operatives put their values into practice.

1st Principle: Voluntary and Open Membership

Co-operatives are voluntary organisations, open to all persons able to use their services and willing to accept the responsibilities of membership, without gender, social, racial, political or religious discrimination.

2nd Principle: Democratic Member Control

Co-operatives are democratic organisations controlled by their members, who actively participate in setting their policies and making decisions. Men and women serving as elected representatives are accountable to the membership. In primary co-operatives members have equal voting rights (one member, one vote) and co-operatives at other levels are also organised in a democratic manner.

3rd Principle: Member Economic Participation

Members contribute equitably to, and democratically control, the capital of their co-operative. At least part of that capital is usually the common property of the co-operative. Members usually receive limited compensation, if any, on capital subscribed as a condition of membership. Members allocate surpluses for any or all of the following purposes: developing their co-operative, possibly by setting up reserves, part of which at least would be indivisible; benefiting members in proportion to their transactions with the co-operative; and supporting other activities approved by the membership.

4th Principle: Autonomy and Independence

Co-operatives are autonomous, self-help organisations controlled by their members. If they enter into agreements with other organisations, including governments, or raise capital from external sources, they do so on terms that ensure democratic control by their members and maintain their co-operative autonomy.

5th Principle: Education, Training and Information

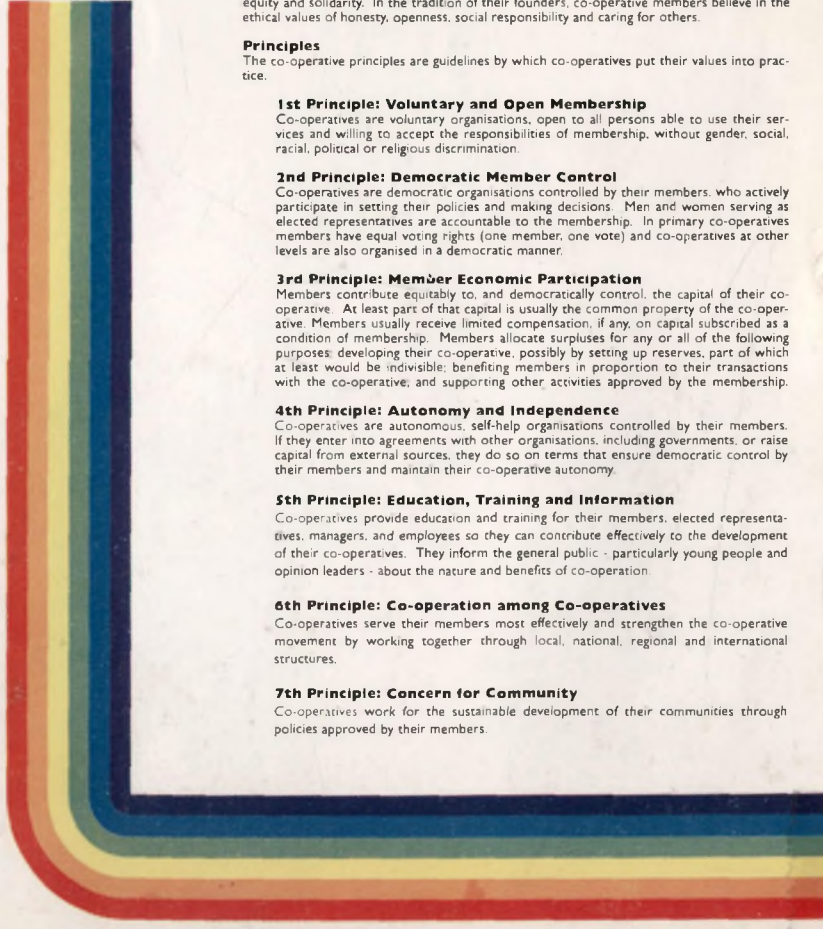

Co-operatives provide education and training for their members, elected representatives, managers, and employees so they can contribute effectively to the development of their co-operatives. They inform the general public - particularly young people and opinion leaders - about the nature and benefits of co-operation.

6th Principle: Co-operation among Co-operatives

Co-operatives serve their members most effectively and strengthen the co-operative movement by working together through local, national, regional and international structures.

7th Principle: Concern for Community

Co-operatives work for the sustainable development of their communities through policies approved by their members.
