# TRADE PROFILE ICA ASIA PACIFIC REGION

(AGRICULTURAL COMMODITIES)

330:339  
ICAT

Regional Office for  
Asia & the Pacific

## Foreword

In all the countries of Asia and Pacific, cooperatives occupy an important place and they are diversified in all sectors of economic activities. In Asia-Pacific region, individual membership of cooperatives account for more than 360 million. However, in spite of very diversified and vast activities, their involvement in international trade with the exception of Japan and Australia has been minimal.

A decade back ILO with the assistance of SIDA had started a ILO/SIDA Cooptrade Project with the objective of promoting international cooperative trade. This project was initiated particularly keeping in view the background that cooperatives in the West were buying goods worth millions of dollars from Asia but practically all these purchases were from the private sector. This project later on in 1982 was transferred to ICA and has been operating as ICA/SCC Project. Various activities including technical consultancies and training programmes have been carried out under the project.

One of the objectives under the Project is to provide trade information to such cooperatives in the region who are interested or have potential in undertaking international trade. It is with this objective that the present information has been compiled on export-import of agricultural commodities in Asia-Pacific Region as a reference material. This information is confined to the export-import of agricultural commodities as a first phase and at a later date an attempt will be made to publish similar information on non-agricultural products. This compilation is based basically on the publications of FAO, WHO and other UN bodies primarily with a view to facilitating as reference material. The countries covered in this publication are only those which are members of ICA and not all the Asia-Pacific countries. For other countries, the members could refer the relevant publications which have been indicated in the bibliography.

I do hope cooperatives in Asia-Pacific Region will make full use of this publication in exploring potentials of international trade.

G.K. Sharma  
Regional Director

New Delhi  
23 July, 1990
