P R E F A C E

The ICA Statistics of Affiliated Organisations for 1975 and 1976 have been compiled from replies received in answer to questionnaires issued to member organisations in 64 different countries. Other sources consulted have been annual reports, published articles and in some cases information obtained from individuals. Where information has not been received, the latest available figures have been used to enable the reader to have a point of comparison. The Statistics cover the number of members, societies and employees; membership as a percentage of population; turnover; reserves; share capital; total own capital; and insurance figures. Exchange rates used for conversion of national currencies into US\$ are presented in Table 7. The following points, however, need clarification.

(i) In keeping with the practice of UN organisations, the money figures are given in US\$. Conversions into US\$ with some exceptions have been calculated on the basis of the International Financial Statistics. The exchange rates noted in the London Financial Times have sometimes been used. Exchange rates are subject to fluctuations and, therefore, the money figures can only give a relevant indication of the progress made in cooperatives in different countries;

(ii) Share capital, reserves and total own capital figures are introduced for the year 1975 for the first time.

(iii) Share capital, reserves and total own capital like the trade figures are provided for consumer and agricultural cooperatives and in some cases include that of retail and wholesale and primary and federal respectively and, therefore, are shown separately. For fisheries, workers' productive, credit, housing and miscellaneous societies, the bulk of the trade relates to that of primary societies; but, the figures also indicate some federal societies shown under the primary category only;

(iv) In some countries, Japan and Iran for example, agricultural cooperative societies also function as credit cooperatives. For the purpose of classification they are shown as agricultural cooperatives in either of these countries. In Iceland, cooperatives are

P R E F A C E

Les statistiques sur les organisations affiliées à l'ACI, pour les années 1975 et 1976, ont été établies à l'aide des réponses aux questionnaires envoyés aux organisations membres dans 64 pays ainsi que sur la base de rapports annuels, articles édités et, dans certains cas, de données communiquées individuellement. Là où aucune statistique ne nous a été fournie, nous avons utilisé les derniers chiffres en date dont nous disposions, ceci pour permettre au lecteur d'avoir une base de comparaison. Les statistiques couvrent les effectifs du sociétariat, le nombre de sociétés, les effectifs de personnel, la proportion de membres par rapport à la population, le chiffre d'affaires, les réserves, le capital social, le capital propre et les chiffres des assurances. Les taux de change utilisés pour la conversion des monnaies nationales figurent au Tableau 7. Il convient toutefois d'ajouter les précisions suivantes:

- (i) Conformément à l'usage adopté dans les organisations de l'ONU, les chiffres monétaires sont donnés en dollars US. A part certaines exceptions, la conversion en dollars repose sur les statistiques financières internationales. Parfois aussi, ce sont les taux de change figurant dans le Financial Times de Londres qui ont été utilisés. Les taux de change étant toutefois sujets à variation, les chiffres monétaires indiqués serviront surtout à se faire une idée des progrès réalisés dans les coopératives des différents pays intéressés.
- (ii) Pour la première fois, nous présentons, pour l'année 1975, des chiffres se rapportant au capital social, aux réserves et aux capitaux propres totaux.
- (iii) Les chiffres afférents au capital social, aux réserves et aux capitaux propres totaux, de même que les chiffres d'affaires, sont fournis pour les coopératives de consommation et agricoles et, dans certains cas, embrassent aussi les chiffres respectifs des magasins de gros et des coopératives primaires et fédérations et sont donc indiqués séparément. En ce qui concerne les coopératives de pêcheurs, les SCOP, les caisses de crédit, les coopératives d'habitation et les coopératives d'activités diverses, la plus grosse partie du commerce réalisé est le fait de sociétés primaires mais les chiffres se rapportent aussi à certaines fédérations figurant seulement sous la catégorie "sociétés primaires".

engaged in trade in farm produce, fish and consumer goods, but the Statistics indicate that there are only consumer cooperatives. In Hungary, consumer cooperatives are also engaged in marketing and supply while the agricultural are essentially farming rather than trading societies. In Sri Lanka, what were once established as consumer cooperatives are now multi-functional in character. The figures for numbers of societies include both primary or retail and federal societies.

(v) Some figures for construction undertaken by housing cooperatives have been included in the Statistics but not included in the total trade figures. Building by workers' productive societies is, however, included in the figures for turnover.

The percentage variation in the membership, societies and turnover between the years 1975 and 1976 are given in the following table:

	Membership	Societies	Turnover
Consumer	+ 1.67	- 2.60	+ 9.16
Credit	+ 2.99	+ 0.62	---
Agricultural	+ 5.03	+ 20.51	- 1.55
Productive	+ 1.61	+ 7.06	+ 12.16
Fishery	+ 3.29	+ 19.65	+ 0.64
Miscellaneous	+ 0.68	+ 21.67	+ 4.62
Housing	+ 8.49	- 0.76	---
Total	+ 2.95	+ 8.29	+ 3.09

The ICA wishes to thank a large number of organisations, including member organisations, and many individuals who have helped them in the collection of these statistics.

(iv) Dans certains pays, par exemple au Japon et en Iran, les coopératives agricoles font aussi fonction de coopératives de crédit. Pour des raisons de classification, nous les avons indiquées au titre des coopératives agricoles. En Islande, les coopératives se livrent au commerce des produits agricoles, du poisson et des articles de consommation, bien que les statistiques ne fassent figurer que des coopératives de consommation. En Hongrie, les coopératives de consommation se livrent aussi à la commercialisation de la production et à la distribution des approvisionnements, tandis que les coopératives agricoles dans ce pays sont essentiellement des exploitations agricoles plutôt que des entreprises commerciales. Au Sri Lanka, les coopératives créés à l'origine comme des coopératives de consommation ont maintenant un caractère à but multiples. Les chiffres afférents au nombre de sociétés embrassent à la fois les coopératives primaires ou de détail et les fédérations.

(v) Certains chiffres se rapportant à la construction réalisée par des coopératives d'habitation figurent dans les statistiques mais ne sont pas inclus dans les chiffres d'affaires totaux. En revanche, les données concernant les coopératives ouvrières de production du secteur bâtiment sont indiquées dans les chiffres d'affaires.

Nous indiquons dans le tableau ci-dessous le pourcentage d'accroissement ou de déclin des effectifs de sociétariat, du nombre de sociétés et des chiffres d'affaires entre les années 1975 et 1976:

	Sociétariat	Sociétés	Chiffres d'affaires
Consommation	+ 1.67	- 2.60	+ 9.16
Crédit	+ 2.99	+ 0.62	---
Agriculture	+ 5.03	+20.51	- 1.55
Production	+ 1.61	+ 7.06	+12.16
Pêche	+ 3.29	+19.65	+ 0.64
Habitation	+ 8.49	- 0.76	---
Divers	+ 0.68	+21.67	+ 4.62
Total	+ 2.95	+ 8.29	+ 3.09

L'ACI tient à remercier les nombreuses organisations, membres et autres, qui par leur concours lui ont permis d'établir ces statistiques.

NOTES

The International Cooperative Insurance Federation, formerly the Insurance Committee of the ICA, has been helpful in the compiling of Insurance Statistics. The information for the years 1975 and 1976 refer to 81 Insurance Societies in membership of the Federation.

The information presented on page 65 refers to eight Insurance Societies not in membership of the Federation but whose national organisations are affiliated to the ICA.

* - Estimated

La Fédération internationale de coopératives d'assurances, anciennement Comité des assurances a bien voulu nous aider à recueillir les statistiques des assurances. Les données des exercices 1975 et 1976 se rapportent à 81 sociétés d'assurances membres de la Fédération.

Les données figurant à la page 65 se rapportant à 8 sociétés d'assurance qui ne sont pas membres de la Fédération mais dont les organisations nationales respectives sont affiliées à l'ACI

* - Estimé

NOTES

The population figures for the year 1976 have been extracted from the World Bank Atlas, 1977.

The membership figures are presented as a proportion of the population and arranged in descending order in respect of percentage average. However, the figures presented can only serve as a rough indication of the position of the world cooperative membership figure in relation to population. Problems of duplication and multi-purpose cooperatives are just some of the hazards to contend with in the compilation of statistics.

Les statistiques démographiques de l'année 1976 sont extraites du World Bank Atlas, 1977.

Les chiffres de sociétariat qui sont présentés sous une forme proportionnelle à la population et disposés dans l'ordre décroissant des pourcentages moyens. Précisons toutefois que ces chiffres tels qu'ils sont présentés ne peuvent servir qu'à titre très schématisé, pour donner au lecteur une certaine idée de l'importance numérique des coopérateurs par rapport à la population totale. Les emplois multiples de certaines statistiques, notamment en ce qui concerne les coopératives couvrant plusieurs secteurs d'activité constituent l'un des problèmes auxquels on se heurte au moment de dresser les statistiques.
